

Applications:

The in floor Fiber Cassette enclosure is an ideal zone cabling solution serving as a consolidation point or zone distribution area. The in-floor enclosure saves valuable real estate by providing a secure solution under the floor which relieves congestion on racks and cabinets for installing network equipment. The enclosure can be used along with up to 14 pre-terminated fiber cassettes as a ZDA for instant data center installations and reconfigurations. The innovative lift-out tray design allows for easy cable configurations, minimizes cable pinching and will maintain proper bend radius for cable. Comes complete with mounting hardware for all raised floor designs or simple ground mount installation.

Features:

- ◆ Lockable secure lid design
- ◆ Fold out platform allows for accessibility to 14 channel fiber optic cassettes
- ◆ 14 MPO – Input/output 84 channels of SC Duplexes
- ◆ Multiple knockout configurations available, edge protected cable access points
- ◆ Simplified design reduces network downtime and labor costs associated with MAC work
- ◆ Constructed from 16 GA galvanized steel with customer specified powder coat finish available
- ◆ Multiple sizes available
